Expense Reimbursement Policy

Document ID: FIN-001
Owner: Finance
Version: 1
Effective date: 2026-01-01
Audience: All employees

Purpose and scope

Employees need consistent rules for claiming approved business costs.

Policy

Submit an expense claim within 30 calendar days of the purchase. Every claim needs a receipt and a business purpose; personal purchases are not reimbursable.

Procedure

Enter the date, amount, category, and purpose in the expense portal. Attach the receipt and send the claim to the line manager for review before Finance pays it.

Responsibilities and follow-up

The manager checks the business reason and receipt; Finance checks policy limits and payment details. Employees can track a returned claim in the portal and correct it there.

Example

For an approved taxi ride, the employee records the fare, receipt, date, and business purpose in the portal within 30 days. The manager reviews it before Finance pays.

Exceptions

For a missing receipt, request a written exception from Finance before submitting the claim.
